

SCUOLA VR 4.0

Engaging and innovative educational labs using Virtual Reality and Artificial Intelligence and designed for students of all ages, offering a unique and interactive learning experience

Scuola VR 4.0

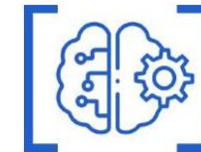

*Enabling technology for
Industry 4.0*

OBJECTIVES

Transfer **hands-on skills** to students of all ages through the immersive and interactive experience of VR (and beyond)

Accelerate and **enhance the learning curve** through immersive scenarios

Enable teachers to display 3D objects at actual, reduced or enlarged scale in Mixed and Virtual Reality

Examine individual objects in detail by rotating and interacting with them

ADVANTAGES

75% increase in information retention thanks to experiential learning.

Enhancement of creativity, curiosity, and active participation of learners.

Independent creation of educational content by teachers and the use of third-party materials.

20% improvement in results with VR, AR, MR, AI and 360° content

Sharing interactive learning content in Virtual Reality with other schools

SOFTWARE

Scuola VR 4.0 is the software that allows you to:

1

Manage and control the headsets of all learners simultaneously

2

Access an extensive library of over 480 VR experiences, including multiplayer content, organised by subject and available both in the classroom and remotely

3

Create Virtual Reality tests and exams in just a few clicks

4

Manage Artificial Intelligence content

5

Explore an extensive catalogue of over 800 3D models covering more than 20 school subjects

6

Upload 3D models, images and videos for the lessons

VR CONTENT

We offer a constantly expanding catalogue of over 480 experiences covering humanities, science and technical subjects.

Each experience is designed and developed in collaboration with education professionals and partner schools to ensure high-quality and highly engaging learning.

HUMANITIES CONTENT

VR humanities content consists of educational lessons in Virtual Reality that offer students an immersive and interactive experience to explore and understand linguistic, cultural, and humanities heritage in an innovative and engaging way.

Economics

HARDWARE

Meta Quest 3S

The best headsets on the market, which thanks to their ease of use and battery life, are perfect for formative use

Sync & Charge Cart

Essential for synchronizing, charging, and storing headsets.
Available in 10, 20, and 30 unit versions

Sync & Charge

Sync hub, in case you already have a charging cart without this feature

HARDWARE

PC

Provided to the teacher for managing the lesson and content

Tablets and interactive tables

To allow even the youngest to have an initial approach to three-dimensions and digital learning experiences
